Vortok Lightweight AWS Magnet is now FULLY APPROVED!

Vortok International is pleased to announce that its Lightweight AWS Magnet is now fully approved by Network Rail. Developed and tested in the UK, this product is a huge step forward from existing methods.

The Vortok Lightweight Magnet offers significant savings in installation times. The complete system weighs just 20 kg which makes it easier to carry to site by just one person and quicker and safer to install within one minute.

When used in conjunction with the Vortok Signboard Support, a temporary speed restriction can be installed safely using minimal manpower and no tools.

Versions are available for standard strength yellow and extra strength green for DC/3rd rail areas. Both styles weigh no more than 20Kg each.

Both Magnets are available either direct from Vortok or from NRS in Crewe.

The catalogue numbers are:

062/006790 - Vortok Temporary AWS Magnet, Standard Strength (Yellow)

062/006791 - Vortok Temporary AWS Magnet, Extra Strength (Green - 3rd Rail Areas)

062/006792 - Bull head adaptor for the above.
