Press Release 28th June 2004 VERSE® adopted by SNCF

SNCF in France have purchased their first set of VERSE® equipment from Vortok International. VERSE® is now the standard method for measuring the neutral temperature by truly non-destructive means in 11 countries and by 26 different railway companies worldwide.

Accurate management of neutral temperature can prevent rail buckles and breaks. VERSE® is highly accurate and reliable allowing rail data to be stored in a computerised database for easy monitoring.
